Assistant Teacher (IT) 2010-Present

ITI Technical College, Part-time

After graduating from ITI in the Information Tech. department, I maintained a very good relationship with my former instructors as well as the rest of the staff. I often volunteered to give guest lectures to the students about many of the interesting things I have learned since I have left ITI to enter a professional development career. As a result, I was asked to join the staff when there was an opening for a part time teaching position in the IT department. It gives me great pleasure to be able to work with students that are in the position I was in just a short time ago.
